

SmarTeam Object Class Migration Tool

Challenges

- Unable to change an object's class in SmarTeam once the object is created

Solution

- SmarTeam Object Class Migration Tool
 - An utility for migrating objects from one class to another

Features

- Easy source and destination classes selections
- Customizable field mappings between the source and destination classes
- Preserve object links and references after migration

Benefits

- Tremendous time savings when migrating objects across classes
- May be used to fix data consistency errors

Example

- New classes are added to the database and legacy data need to be converted to the new classes
- The SmarTeam Object Class Migration Tool may be used to quickly and safely convert the legacy data to the new classes
