

# Web-Based SmarTeam Workflow User Assignment Wizard

## Challenges

- Dynamic assignment of users to workflows is tedious and error-prone

## Solution

- Web-based SmarTeam Workflow User Assignment Wizard
  - Provides a web-based, simplified and intuitive approach for assigning users to nodes in a workflow

## Features

- Clean and intuitive, wizard-based GUI for accepting and promoting the next user in a workflow
- Role-based listing of available users for workflow assignment
- User assignment via simple list selection or text entry
- Option to add comments by current user prior to workflow advancement
- User comments may be made mandatory via configuration

## Benefits

- Expedites and simplifies dynamic user assignments to workflows
- Wizard-based approach reduces processing error

## Step 1

Select user(s) to assign to the step named **Solutions Manager Approve**

Enter the user's login or select from the list.

| Select Users         |                                       | Selected Users |
|----------------------|---------------------------------------|----------------|
| <input type="text"/> |                                       |                |
| solution, .          | <input type="button" value="Add"/>    | joe, .         |
|                      | <input type="button" value="Delete"/> |                |

## Step 2

Please enter optional comments for your action.
